Extra Activities Available:

Dance with Camille Deal
Piano with Lusa Rylski

Thanksgivings science project:

Here is what you'll need to make your own crystal feathers:

- Faux feathers
- Salt (1 regular size box of salt makes enough for 3 feathers)
- Mason jars
- Clothespins

Steps:

1. Pour water into Mason jar.
2. Then pour water into pot and boil until salt dissolves.
3. Continue to put salt into boiling water until it forms crystals
4. Put water back into Mason jar
5. Grab the end of your feather with a clothespin so you can suspend it over the center of the jar.
6. Dip the feather into the jar and set it in a sunny window.
