

February

FIZZY HEART BOMBS

SUPPLIES

- Baking soda
- Red or purple food coloring
- Heart molds
- Small Bowl
- Spoon
- Water
- Cookie Sheet
- Pipettes
- Vinegar

INSTRUCTIONS

MIX THE BAKING SODA, RED FOOD COLORING AND WATER TOGETHER IN A SMALL BOWL. Add the water a little bit at a time. You want enough water so that the baking soda sticks together, but not so much that it turns soupy.

PLACE THE BAKING SODA MIXTURE INTO THE HEART MOLDS. I found silicone works best for this activity.

PLACE THE HEARTS INTO THE FREEZER AND LET THEM HARDEN. I left mine overnight, but you can use the hearts after 30 minutes or so if you prefer.

PLACE THE HARDENED HEART ONTO A COOKIE SHEET. Place some vinegar in a small bowl. You don't need a large amount of vinegar, but you can always add more to the bowl when you need it.

USE A PIPETTE TO PICK UP THE VINEGAR AND DROP IT ONTO THE HEARTS. Using a pipette is a wonderful way for young children to develop fine motor skills, such as pincer grip and hand-eye coordination.

WATCH AS THE HEARTS BUBBLE AND FIZZ AS THE CHEMICAL REACTION TAKES PLACE. Repeat steps 6 and 7 until all of the hearts have melted away and won't bubble anymore. Or until your children have finished exploring.

DATES TO REMEMBER

FEB 1ST: NATIONAL FREEDOM DAY

FEB 2ND: GROUNDHOG DAY

FEB 4TH: WORLD CANCER DAY
