

February

Borax Crystal Hearts

SUPPLIES

- Mason jar
- Borax (for adults to handle)
- Boiling water (for adults to handle)
- Pipe cleaner
- Popsicle stick (or pencil)
- String

INSTRUCTIONS

- 1. Shape your hearts!**
Bend your pipe cleaners into heart shapes. You can twist two colors together or even connect two hearts for extra sparkle!
- 2. Attach your heart.**
Use the string to tie your pipe cleaner heart to a popsicle stick (or pencil). Tape it in place so it doesn't slide. This will help your heart hang in the jar without touching the sides or bottom.
- 3. Make the crystal solution (grown-up help needed!).**
Mix 3 tablespoons of borax powder with 1 cup of boiling water. Stir until the borax dissolves. This is called a *saturated solution*—a cool chemistry trick!
⚠️ *Adult supervision required for boiling water.*
- 4. Pour it in.**
Carefully pour the solution into a glass jar.
- 5. Lower your heart into the jar.**
Gently place your pipe cleaner heart into the solution so it is fully submerged.
- 6. SHHH... crystal magic is happening! ✨**
Leave the jar somewhere safe and still for 24 hours. You can peek, but don't shake or move it.
- 7. Reveal your crystal heart!**
After 24 hours, carefully remove your crystal heart ornament and admire your sparkly creation!

DATES TO REMEMBER:

FEB 2ND: GROUNDHOG DAY

FEB 6TH: FROZEN YOGURT DAY

FEB 7TH: FETTUCCHINE ALFREDO DAY

FEB 9TH: CHOCOLATE DAY

FEB 14TH: VALENTINES DAY
